

FunSand Meets And Surpasses All Lead Safety Standards Set Forth By The Consumer Products Safety Commission (CPSC) As Of February 10, 2009

As of February 10, 2009 the Consumer Products Safety Commission (CPSC) has mandated that consumer products intended for children 12 and under cannot have more than 600 parts per million (ppm) of lead in any accessible part. FunSand not only meets this requirement, it vastly exceeds this requirement making FunSand one of the safest consumer products available with regard to lead content. All FunSand products have tested at less than 10 parts per million (ppm) making them virtually lead-free.

Below are test results for Lead content as performed by an independent testing laboratory.

LABORATORY REPORT

Report Date: 02/06/09

Thorworks Industries
2520 S Campbell St
Sandusky OH 44870

SAMPLE ID	LAB ID	ANALYSIS	RESULT(S)
Purple Fun Sand	H-0726	Lead	< 8 ppm
Blue Fun Sand	H-0727	Lead	< 9 ppm
